Objective

Detail-oriented UI/UX Designer with an academic foundation in Physics and Computer Science from Zagazig University. Seeking to leverage hands-on training experience in user research, interactive prototyping, and design system architecture to build intuitive digital products and seamless web and mobile user experiences.

Education

- **Bachelor of Science (B.Sc.) in Physics & Computer Science**
 - Zagazig University | 2027
 - Grade: very good

Experience

- **UI/UX Trainee** | Digital Egypt Pioneers Initiative (DEPI) In Progress
 - Collaborated on real-world product design workflows, analyzing user pain points and developing interactive UI solutions.
 - Structured user flows, wireframes, and high-fidelity screen layouts adhering to usability principles.
- **UI/UX Trainee (Practical Training)** | Eraa Soft September 2026
 - Formulated visual branding assets, color palettes, typography scales, and UI layouts for specialized digital applications.
 - Prepared developer handoff assets, redlines, and design tokens for seamless front-end implementation.
- **UX/UI Trainee** | Information Technology Institute (ITI) Summer Training 2026
 - Conducted heuristic evaluations and competitive audits to identify design friction in digital interfaces.

- Designed low-fidelity wireframes and interactive high-fidelity prototypes, iterating layouts based on usability testing feedback.
- **UI/UX Trainee** | National Telecommunication Institute (NTI) June 2026
 - Executed end-to-end UX design workflows, including user interviews, persona creation, and user flow optimization for mobile applications.
 - Created scalable design systems in Figma with reusable component libraries and auto-layout rules.

Courses and Certificates

- **Digital Egypt Pioneers Initiative (DEPI)** – UI/UX Design
- **UI/UX & Product Design Training** – Eraa Soft
- **UI/UX Designer Professional Training** – National Telecommunication Institute (NTI)
- **UX/UI Summer Training Program** – Information Technology Institute (ITI)

Skills

- **Technical Skills:**
 - **UX Research & Strategy:** User Research, User Journeys, Information Architecture, Wireframing, Usability Testing, Heuristic Evaluation.
 - **UI & Interaction Design:** Design Systems, Component Libraries, Interactive Prototyping, Micro-interactions, Responsive Layouts, Accessibility (WCAG), Right-to-Left (RTL) Design.
 - **Tools & Software:** Figma, Adobe XD, Illustrator, Photoshop
- **Soft Skills:**
 - Analytical Problem-Solving.
 - Clear Communication & Design Presentation.
 - Cross-Functional Collaboration & Teamwork.
 - Precision & Visual Detail.
 - Adaptability & Feedback Integration.
- **Languages:**
 - **Arabic:** Native
 - **English:** Very Good (Written & Spoken)

Projects

- **El-Dewan Restaurant Landing Page (Arabic Traditional Cuisine Web Page)**
 - Designed an Arabic-first, Right-to-Left (RTL) responsive landing page for a traditional Arabic restaurant, focusing on brand identity, food presentation, and visual hierarchy.
 - Formulated user journeys for table reservations and food ordering, optimizing navigation and CTA (Call to Action) placements for Arabic-speaking users.
- **VitaLife Application (Smart Wearables Health & Vital Signs App)**
 - Designed an end-to-end mobile app UI connecting seamlessly with smartwatches and smart rings to monitor real-time vital health indicators (heart rate, blood oxygen, sleep tracking, and body temperature).
 - Formulated intuitive dashboard data visualizations, clear metrics hierarchy, and rapid-alert user flows for critical health updates.
- **G-Parts-Pro Application (German Automotive Spare Parts Mobile App)**
 - Conducted competitive audits and designed high-fidelity splash screens, home layouts, and color themes focused on spare part catalog navigation.
 - Engineered simplified search and filter user flows to reduce navigation drop-off.
